SUMMARY

Business systems builder who helps companies replace dated software and manual workflows with systems people find easy to use. For eight years I ran a multi-crew service company and owned every system behind it, so I know what the office, the field team and the customer each need from a screen. I map how the work actually flows, find where it breaks, and design and build the fix, from requirements to a working front end. Most recently I defined and built BrightBase, the operations platform that replaced Connecteam and now runs the office and field teams day to day.

SKILLS

Business analysis	Requirements gathering, process mapping, user stories and acceptance criteria, system evaluation and selection, user acceptance testing, data migration, documentation and training
Workflow and UX	Workflow and screen design from user needs, mobile-first interfaces for field crews, consistent design systems, client portals and booking flows
Front end	React, TypeScript, Next.js, Tailwind CSS, responsive layouts, Vite
Back end and data	Python (FastAPI), SQL, PostgreSQL, data modeling, pandas, KPI and revenue reporting, dashboards
Integrations	REST APIs, webhooks, OAuth 2.0, Stripe and Stripe Connect, Google Workspace APIs, Twilio, iCal calendar sync
Delivery	Automated testing and CI, Git and GitHub, Docker, Railway, Vercel, Supabase

EXPERIENCE

Founder and Technical Operations Lead · The Maine Cleaning Company — 2018 – present

- Built a residential, commercial and short-term rental cleaning business to **$1M+ in revenue collected since 2023** (peak year $414K in 2024) across **4,900+ completed service visits** in 40+ Maine towns; 63% of paying clients rebooked and bad debt stayed under 0.1% of invoiced revenue.
- Tracked operations in numbers and tightened them: from 2023 to 2025, visits with a cleaner assigned rose from 74% to 96%, recurring work grew from 90% to 97% of visits, and booked value per scheduled hour rose 20% from 2024 to 2025.
- Mapped the end-to-end service workflow with office staff and field crews, from request and quote through scheduling, dispatch, invoicing, payment and recurring service.
- Evaluated 28 paid software tools, including Jobber, Connecteam, Housecall Pro and HubSpot, and documented the gaps in scheduling, payroll, reporting and integrations they could not close.
- Defined the requirements and data model for BrightBase and moved the office and crews onto it. It is now the system of record for scheduling, dispatch, invoicing, payments and subcontractor payouts.
- Integrated Stripe payments and payouts, Google Calendar and Gmail, Twilio calls and SMS, Airbnb and VRBO calendars, and Facebook lead ads into one workflow.
- Traced a revenue reporting defect and sync errors that were creating duplicate jobs, and consolidated every website lead form into one intake path with duplicate checks.
- Hired, trained and managed 50+ employees and subcontractors, and wrote the standards and training that kept rotating teams consistent.

Founder and Developer · M Studio (mlinx.studio) — 2026 – present

- Scope, build and support websites and business tools for small businesses, from requirements intake through deployment and handoff.

- Client work includes Nash Construction (Nashua, NH) and The Remote Admin, delivered with plain-language documentation and every account owned by the client.
- Launched M Linx Guide, a digital guest guide product for short-term rental hosts; first paying client July 2026.

Lead Dental Assistant and Administrative Support · Southern Maine practices 2014 – 2018

- Scheduling, documentation, patient flow and staff training.

Administrative Assistant · SMCC Office of the President 2013 – 2014

- Correspondence, scheduling and confidential records.

SELECTED PROJECTS

BrightBase Operations platform · in daily use

Office and crew workspaces covering intake, quoting, scheduling, dispatch, invoicing, payments and subcontractor payouts, with role-based access, data isolation between companies, offline support for crews in low-signal areas, and 4,100+ automated tests gating every change.

Python · FastAPI · React · PostgreSQL

linx Two-sided marketplace · launch readiness

Property owners post cleanings and vetted cleaners bid, with server-enforced roles, an admin vetting queue, Stripe Connect payouts and 900+ automated tests.

Python · FastAPI · React · PostgreSQL

maineclean.co Live customer site

Instant estimates and booking requests that land in BrightBase as clean records, plus a client portal.

React · TypeScript · PostgreSQL · maineclean.co

EDUCATION AND TRAINING

B.S. Business Analytics and Artificial Intelligence · University of Southern Maine In progress

Minor in Computer Science. Relevant coursework: Technical Writing.

IBM Full Stack Software Developer Professional Certificate · Coursera Expected Dec 2026

BCG GenAI Job Simulation · Forage Feb 2026

- Completed a job simulation involving AI-powered financial chatbot development for BCG's GenAI Consulting team.
- Gained experience in Python programming, including the use of libraries such as pandas for data manipulation.
- Integrated and interpreted complex financial data from 10-K and 10-Q reports, employing rule-based logic to create a chatbot that provides user-friendly financial insights and analysis.

Vista Equity Partners AI in Action Job Simulation · Forage Feb 2026

- Completed a job simulation involving prompt engineering and GenAI workflow automation for Vista's Portfolio Operations team.
- Applied Vista's four-part prompt framework (Ask, Context, Examples, Desired Output) to synthesize customer NPS survey feedback into executive-ready insights, improving clarity and relevance of outputs by more than 50% through iteration.
- Designed and tested repeatable GenAI workflows (news aggregation, data reconciliation, and qualitative insight summarization) using tools such as ChatGPT and Copilot, ensuring accuracy, professional tone, and scalability.
- Evaluated AI-generated outputs for accuracy, tone, and usefulness; implemented guardrails and refinement techniques that reduced error rates and increased stakeholder usability of results.
