PORTFOLIO

megan.mlinx.studio →

See the work behind this résumé: the BrightBase case study (one operations system that replaced 12 of 28 paid tools), screens from the live apps and sites, and the operations data behind the numbers below.

SUMMARY

Business systems builder who turns dated software and manual workflows into systems people find easy to use. Eight years running a multi-crew service company and owning every system behind it, from the office to the field crews to the customer. Most recently defined and built BrightBase, the operations platform that now runs the company day to day.

SKILLS

Business analysis	Requirements, process mapping, user stories and acceptance criteria, UAT, data migration, documentation and training
Workflow and UX	Workflow and screen design, mobile-first field apps, client portals, booking flows
Development	React, TypeScript, Next.js, Tailwind CSS, Python (FastAPI), SQL, PostgreSQL
Integrations	REST APIs, webhooks, OAuth 2.0, Stripe Connect, Twilio, Google Workspace APIs
Data and delivery	pandas, Power BI, KPI reporting, automated testing and CI, Git, Docker, Vercel, Railway

EXPERIENCE

Founder and Technical Operations Lead · The Maine Cleaning Company — 2018 – present

- Built a residential, commercial and short-term rental cleaning business to **$1M+ collected since 2023** (peak $414K in 2024) across **4,900+ visits** in 40+ Maine towns; 63% of clients rebooked and bad debt stayed under 0.1%.
- Raised visits with a cleaner assigned from 74% to 96% and recurring work from 90% to 97% (2023–2025); booked value per scheduled hour rose 20% (2024–2025).
- Mapped the service workflow with office staff and crews, from request to payment, and evaluated 28 paid tools against it, including Jobber, Connecteam, Housecall Pro and HubSpot.
- Defined the requirements and data model for BrightBase, rolled it out in phases, and made it the system of record for scheduling, dispatch, invoicing, payments and subcontractor payouts.
- Connected Stripe, Google Calendar and Gmail, Twilio, Airbnb and VRBO calendars and Facebook lead ads, and merged every website lead form into one intake path with duplicate checks.
- Hired, trained and managed 50+ employees and subcontractors, and wrote the standards that kept rotating teams consistent.

Founder and Developer · M Studio (mlinx.studio) — 2026 – present

- Scope, build and hand off websites and business tools for small businesses, including Nash Construction and The Remote Admin; every account stays owned by the client.
- Launched M Linx Guide, a digital guest guide for short-term rental hosts; first paying client July 2026.

Lead Dental Assistant and Administrative Support · Southern Maine practices 2014 – 2018

- Scheduling, documentation, patient flow and staff training.

Administrative Assistant · SMCC Office of the President 2013 – 2014

- Correspondence, scheduling and confidential records.

SELECTED PROJECTS

BrightBase · Python, FastAPI, React, PostgreSQL
Operations platform in daily use: intake through payouts, role-based access, an offline-ready crew app and 4,100+ automated tests.

linx · Python, FastAPI, React, PostgreSQL
Two-sided cleaning marketplace with vetted cleaners, Stripe Connect payouts and 900+ automated tests.

maineclean.co · React, TypeScript
Live booking site with instant estimates that feed straight into BrightBase.

EDUCATION AND TRAINING

B.S. Business Analytics and Artificial Intelligence · University of Southern Maine In progress
Minor in Computer Science

IBM Full Stack Software Developer Professional Certificate · Coursera Expected Dec 2026

BCG GenAI Job Simulation · Forage Feb 2026

- Completed a job simulation involving AI-powered financial chatbot development for BCG's GenAI Consulting team.
- Gained experience in Python programming, including the use of libraries such as pandas for data manipulation.
- Integrated and interpreted complex financial data from 10-K and 10-Q reports, employing rule-based logic to create a chatbot that provides user-friendly financial insights and analysis.

Vista Equity Partners AI in Action Job Simulation · Forage Feb 2026

- Completed a job simulation involving prompt engineering and GenAI workflow automation for Vista's Portfolio Operations team.
- Applied Vista's four-part prompt framework (Ask, Context, Examples, Desired Output) to synthesize customer NPS survey feedback into executive-ready insights, improving clarity and relevance of outputs by more than 50% through iteration.
- Designed and tested repeatable GenAI workflows (news aggregation, data reconciliation, and qualitative insight summarization) using tools such as ChatGPT and Copilot, ensuring accuracy, professional tone, and scalability.
- Evaluated AI-generated outputs for accuracy, tone, and usefulness; implemented guardrails and refinement techniques that reduced error rates and increased stakeholder usability of results.
