## SUMMARY

Eight years running a multi-crew cleaning company and every system behind it, from booking to payroll. When the apps we paid for didn't fit how we worked, I designed and built BrightBase, the system the company runs on today. Now looking for a team where I can do this full-time: figure out how the work really flows, find where it breaks, and build the fix.

## SKILLS

| | |
|---|---|
| **Business analysis** | Requirements gathering, process mapping, user stories, acceptance criteria, UAT, data migration, documentation, training |
| **Systems and CRM** | System implementation and rollout, CRM setup and data modeling, workflow automation, vendor evaluation |
| **Development** | React, TypeScript, Next.js, Tailwind CSS, Python (FastAPI), PostgreSQL, SQL |
| **Integrations** | REST APIs, webhooks, OAuth 2.0, Stripe Connect, Twilio, Google Workspace APIs, iCal sync |
| **Data** | Power BI (DAX, star schemas), SQL, pandas, KPI and revenue reporting |
| **Delivery and AI** | Git, GitHub Actions, automated testing, Docker, Railway, Vercel, Supabase, Claude API, Claude Code, prompt design |
| **Platforms** | Jobber, Housecall Pro, Connecteam, Maidily, Turno, Breezeway, BookingKoala, HubSpot, HighLevel, Attio, Twenty, Airtable, Zapier, AppSheet, Google Apps Script, Bubble, Noloco, Softr, Adalo, Glide, Base44, Replit, monday.com, QuickBooks, Square, OpenPhone, Lodgify, Wix, Notion, Google Workspace, Microsoft 365 |

## EXPERIENCE

**Founder and Technical Operations Lead** · The Maine Cleaning Company — 2018 – present

- Grew the company to **$1M+ collected since 2023** (peak year $414K) across **4,900+ visits** in 40+ Maine towns. 63% of clients rebooked; bad debt stayed under 0.1%.
- Got visits with a cleaner assigned from **74% to 96%** and recurring work from 90% to 97% (2023–2025), with booked value per hour up 20%.
- Tested the big field-service and CRM apps, including Jobber, Housecall Pro, Connecteam and HubSpot. None fit, so I gathered requirements with the office and crews and built BrightBase.
- Rolled BrightBase out in phases until it ran scheduling, dispatch, invoicing, payments and subcontractor payouts.
- Connected Stripe, Twilio, Google Calendar, Gmail, Airbnb and VRBO calendars and Facebook lead ads, with one intake path for every website form.
- Hired, trained and managed 50+ employees and subcontractors, and wrote the standards that kept teams consistent.

**Freelance Web Developer** · M Studio (mlinx.studio) — 2026 – present

- Build and hand off websites and tools for small businesses, including Nash Construction and The Remote Admin. Clients own every account.
- Built eight free browser tools at mlinx.studio/tools, including an instant quote and a website checker.
- Launched M Linx Guide, a digital guest guide for rental hosts. First paying client July 2026.

**Lead Dental Assistant and Administrative Support** · Southern Maine practices 2014 – 2018

- Scheduling, documentation, patient flow and staff training.

**Administrative Assistant** · SMCC Office of the President 2013 – 2014

- Correspondence, scheduling and confidential records.

## SELECTED PROJECTS

**BrightBase** · Python, FastAPI, React, PostgreSQL
The operations system the company runs on: rental turnovers from booking calendars, client texts, one lead inbox and an offline crew app. 4,100+ automated tests.

**linx** · Python, FastAPI, React, PostgreSQL
A marketplace app where rental owners post cleanings and vetted cleaners bid. Stripe Connect payouts, 900+ automated tests.

**Agent Command Center** · React, FastAPI, Claude Agent SDK
AI agents for operations, code and coursework that draft the work and wait for my approval before changing anything.

**maineclean.co** · React, TypeScript
Live booking site with instant prices that feed straight into BrightBase.

**Power BI portfolio** · Power BI, DAX
Four reports on real business, code and school data, with star-schema models and retention measures.

**Twenty CRM build** · Twenty (open source)
An earlier version on open-source Twenty CRM, with custom objects for properties, quotes, jobs and visits.

## EDUCATION AND TRAINING

**B.S. Business Analytics and Artificial Intelligence** · University of Southern Maine In progress
Minor in Computer Science

**IBM Full Stack Software Developer Professional Certificate** · Coursera Expected Dec 2026

**BCG GenAI Job Simulation** · Forage Feb 2026

- Completed a job simulation involving AI-powered financial chatbot development for BCG's GenAI Consulting team.
- Gained experience in Python programming, including the use of libraries such as pandas for data manipulation.
- Integrated and interpreted complex financial data from 10-K and 10-Q reports, employing rule-based logic to create a chatbot that provides user-friendly financial insights and analysis.

**Vista Equity Partners AI in Action Job Simulation** · Forage Feb 2026

- Completed a job simulation involving prompt engineering and GenAI workflow automation for Vista's Portfolio Operations team.
- Applied Vista's four-part prompt framework (Ask, Context, Examples, Desired Output) to synthesize customer NPS survey feedback into executive-ready insights, improving clarity and relevance of outputs by more than 50% through iteration.
- Designed and tested repeatable GenAI workflows (news aggregation, data reconciliation, and qualitative insight summarization) using tools such as ChatGPT and Copilot, ensuring accuracy, professional tone, and scalability.
- Evaluated AI-generated outputs for accuracy, tone, and usefulness; implemented guardrails and refinement techniques that reduced error rates and increased stakeholder usability of results.
